

3-Phase Breaker
powered from direct + whip fitting
up to 40 Amps on each Phase

Product	(double-deck)		Catalog Number
	Voltage	Amp	
LINE-FEED (BREAKERS)	UNIVERSAL	40	P40-4-120-UNIV-CB40-(F)
	120/208V	Custom	P40-4-120-UNIV-CBXX-(F)

Finish - G=Galvanized W=White B=Black

Custom Amperages Available

Breakered Line-Feed with Whip Cord for 3-Phase Power Distribution (40A per Phase)

The Breakered Line-Feed is engineered for flexible positioning anywhere along the busway, optimizing power distribution and reducing homerun lengths. Designed for 40A per phase systems, it features a Fitter for (2) lower deck phases, and cord with Fitter to enable easy connection of the third phase on the top deck, ensuring seamless integration with 3-phase power. Available in galvanized, powder-coated white, and black finishes, it supports universal 120/208V applications and is for use with double-deck lengths. Factory-installed 3 phase circuit breakers provide safety and reliability, making it an ideal solution for high-capacity systems.
