T40 wiring & connection details

3phase neutral | Match the rating on the individual cut sheet

Three-phase power path

Upper-deck C is accessed through the included phase-access whip. Equipment ground continues through the bonded fitting and enclosure to output G.

Neutral continues directly to output N for L21 and L22. Neutral is not a fourth breaker pole.

L15: 208V three phase. L16: 480V three phase. L21: 120/208V wye with neutral. L22: 277/480V wye with neutral. Use the exact configuration listed on the individual cut sheet.
