T40 wiring & connection details

gfci duplex 120 | Match the rating on the individual cut sheet

Physical phase-access whip

Upper-deck C uses the separately ordered -WP arrangement. The phase-access whip is separate from the equipment output cord.

Electrical paths

Selected phase -> standard 1-pole breaker -> output L

Lower-deck neutral -> output N

Bonded fitting / enclosure -> output ground

One standard 20A single-pole breaker supplies one GFCI duplex receptacle. GFCI protection is at the receptacle assembly, not in the breaker.
