T40 wiring & connection details

unbreakered 120 | Match the rating on the individual cut sheet

Standard lower-deck connection

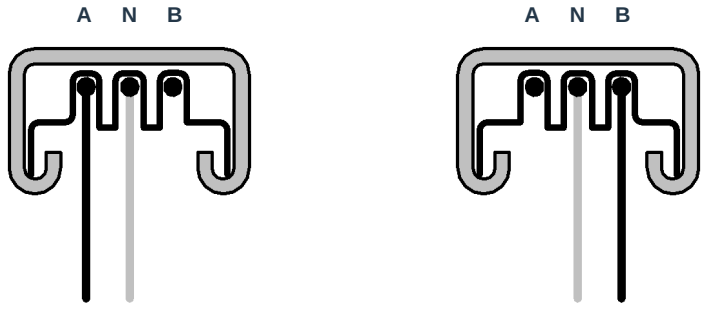

Neutral continues separately to output N; equipment ground follows the bonded fitting and housing path.

No integral breaker is provided in these unbreakered assemblies. Match upstream branch protection to the selected output rating.

STANDARD - lower-deck A or B

Flip the same fitting; same catalogue number.

A + neutral connection

B + neutral connection

No A-specific or B-specific fitting to order.

STANDARD CONFIGURATION

This sheet covers the standard lower-deck arrangement offered for this product.

This family takes lower-deck A or B. The complete assembly ships with the standard fitting.
